KEY INSIGHTS

- ▶ Average attendance of **80.0%** is **10.0pp below** the 90% target — structural barriers (poverty, distance) are limiting impact.
- ▶ Only **49.3%** of schools received supplies in the selected period; **50.2%** reported stock-outs — a critical supply chain failure.
- ▶ Meal coverage rate of **~39.6%** means only 2 in 5 enrolled students receive a meal.
- ▶ Infrastructure score of **2.50/4.0** — water, kitchen, storage and utensil gaps limit safe meal preparation even when food is delivered.

Stock-out Causes (Programme-wide)

Infrastructure Gaps (% of schools affected)

⚠ Supply Chain Critical Findings

- ▶ **Stock-out causes are uniformly distributed** (~25% each) across insufficient ration, late delivery, storage loss, and other — systemic multi-cause breakdown requiring end-to-end reform.
- ▶ **Corruption complaints at ~25%** alongside exclusion, suggesting significant governance failures at delivery and distribution points.
- ▶ All 4 infrastructure components show ~30%+ deficiency — even when food arrives, **schools cannot safely prepare it**.

Dropout Rate Trend

Attendance vs Dropout — Side by Side by Month

★ ATTENDANCE & DROPOUT INSIGHTS

- ▶ Attendance is flat across all months — **not responsive to supply delivery**, suggesting structural barriers (poverty, distance) dominate.
- ▶ Dropout reason is uniformly "Poverty and hunger" — **feeding alone cannot resolve poverty-driven dropout** without complementary cash transfers.
- ▶ No seasonal pattern detected — consistent programme monitoring exists but impact on behaviour change is limited.

★ PRIORITY FRAMEWORK

● Critical: Supply chain, meal coverage, stock-outs — fix these first.

⚠ High: Attendance, dropout, infrastructure — medium-term multi-sector coordination.

● Medium: Partner performance, data quality, gender equity — systems improvements.

1

Fix Supply Chain — Immediate Procurement Reform

Implement real-time supply tracking. Establish 30-day buffer stocks at county level. Enforce SLA with penalties for late delivery. ~50% of schools receive zero food.

● Critical

Supply Chain

Month 1-3

2

Scale Budget to Achieve 100% Meal Coverage

Current budget covers only ~39% of enrolled students. Commission needs-based budget review. Explore WFP co-financing and private sector partnerships.

● Critical

Finance

Month 1-6

3

Eliminate Stock-outs via School-Level Stock Management

Introduce digital stock tracking (mobile-based). Train head teachers. Trigger automated resupply requests below 5-day threshold. Monthly unannounced stock audits.

● Critical

Stock Management

Month 1-3

4

Multi-Sector Approach to Achieve 90% Attendance

Integrate with conditional cash transfers, school health, and free uniform/textbook schemes. Attendance is structurally constrained by poverty — feeding alone is insufficient.

⚠ High

Multi-Sector

Month 3-12

5

Reduce Dropout via Poverty Linkages

Link the feeding database to social protection registries. Identify dropout-risk students for bursary allocation. Monthly community sensitisation forums.

⚠ High

Dropout Prevention

Month 3-12

6

Ring-fence Infrastructure Budget

Ring-fence 15% of budget for infrastructure. Prioritise water, kitchen, storage, utensils. Create a County Infrastructure Investment Plan with 2-year completion.

⚠ High

Infrastructure

Year 1-2

7

Anti-Corruption and Community Oversight

Community oversight committees at every school. Publish beneficiary lists. Anonymous grievance hotlines. Corruption and exclusion = ~50% of all complaints.

⚠ High

Governance

Month 1-6

8

Performance-Based Partner Contracting

Only 50% of partners rated good/excellent. Introduce quarterly performance reviews. Deregister vendors with 2+ consecutive poor ratings.

● Medium

Vendors

Month 3-6

9

Improve Data Quality & Monitoring Protocols

Build validation rules into mobile data collection. 10% spot-check verification on all submissions. Quarterly data quality reviews with county officers.

● Medium

M&E

Ongoing
