1. Executive Summary

This report presents the findings of the Quarter 2 Quality Assurance (QA) assessment conducted across the Mary’s Meals school feeding programme. The assessment evaluated compliance with the school feeding delivery model and tracked key quality metrics across all visited locations, covering 125 schools spanning six affiliate and partner regions.

Overall, the programme demonstrates a satisfactory-to-strong level of adherence to established quality standards, with an average compliance rate of 88% and a data quality score of 84%. Particular strengths were observed in food storage compliance (90%) and cooking and serving standards (86% average rating), both of which improved steadily across the four assessment quarters. Kisumu and Eldoret continue to lead as the highest-performing regions.

Opportunities for improvement have been identified in data quality consistency at Lodwar and Mombasa, timeliness of issue resolution (27% of identified issues remain open or in progress), and supplier warehouse compliance gaps. These findings are elaborated upon in the sections that follow, together with prioritized recommendations and a follow-up action timeline.

Report Highlights

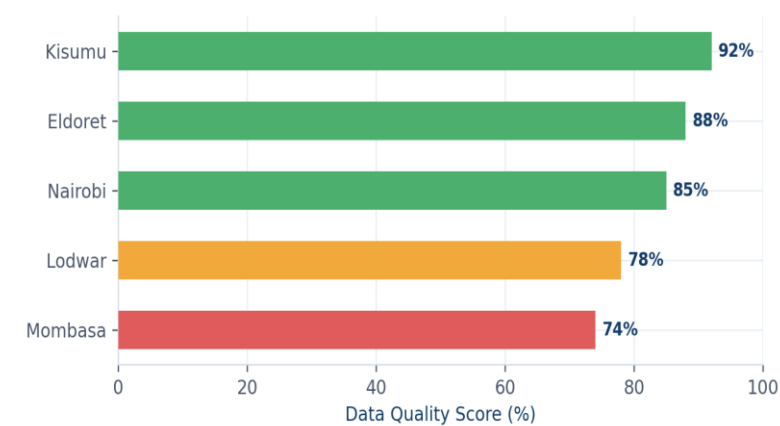

125 Schools Assessed	88% Compliance Rate	84% Data Quality Score	90% Food Storage Compliance	42 Issues Identified
--------------------------------	-------------------------------	----------------------------------	---------------------------------------	--------------------------------

2. Quality Metrics Dashboard

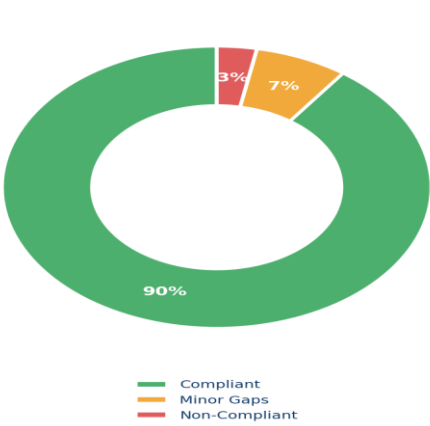

The dashboard below summarizes headline performance across all assessed locations for the current reporting period.

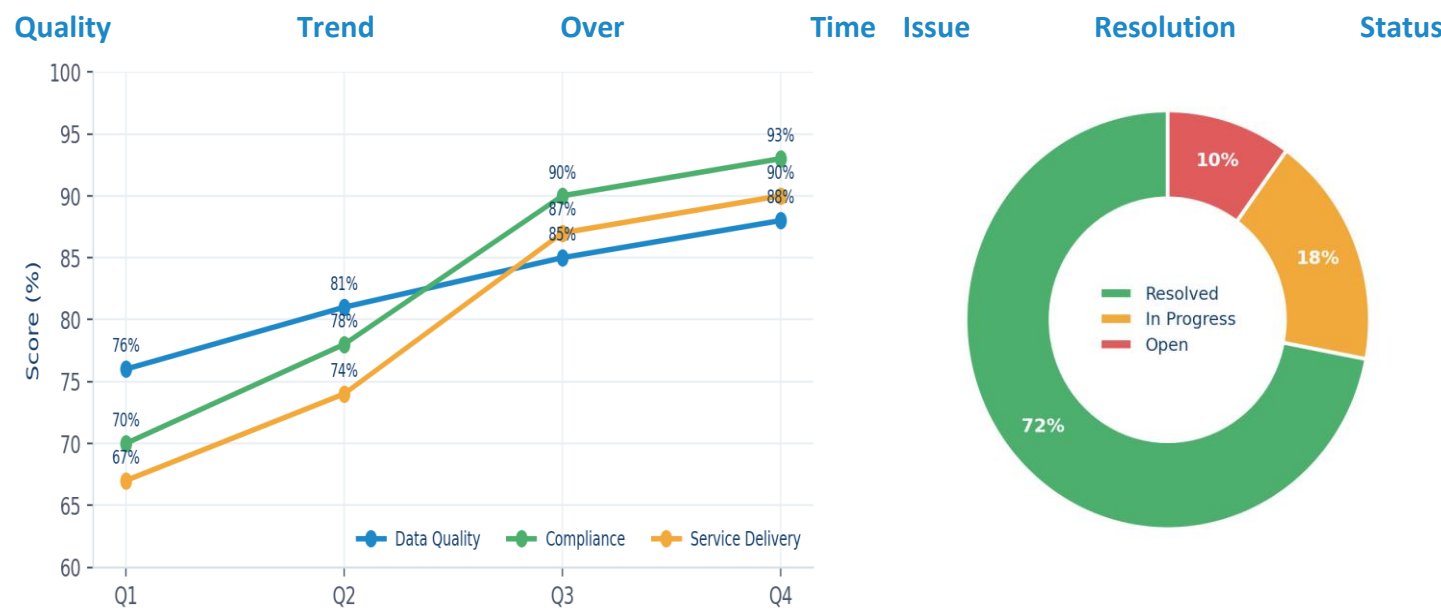

86% Cooking & Serving Rating	31 (74%) Issues Resolved	8 (18%) Issues In Progress	4 (10%) Issues Open	+12% Quality Trend (Q1→Q4)
--	------------------------------------	--------------------------------------	-------------------------------	--------------------------------------

Data Quality Scores by Location

Food Storage Compliance

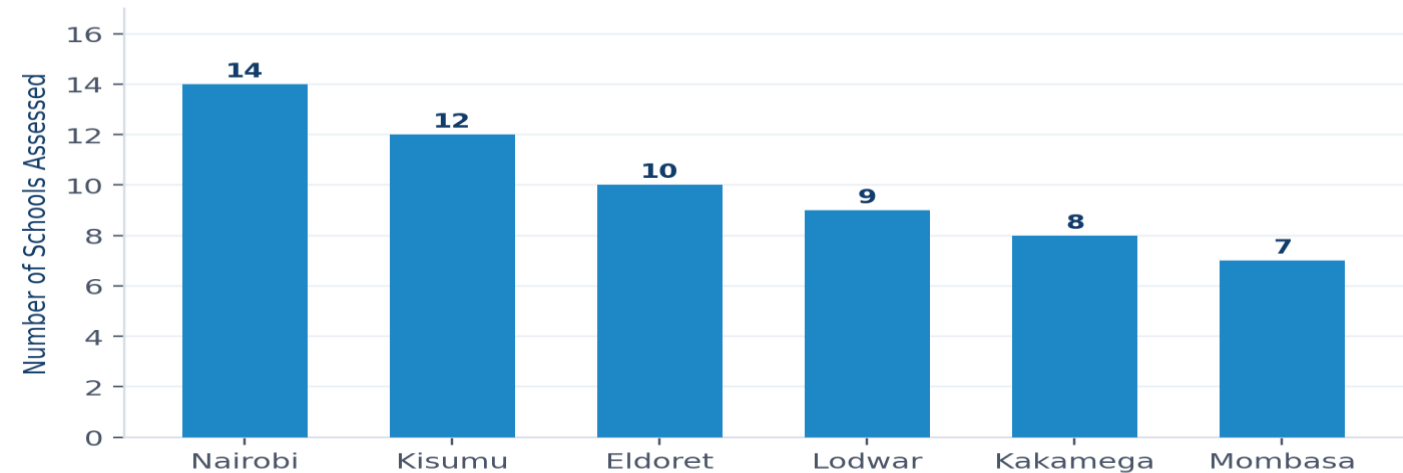

Key Findings & Recommendations Snapshot

Strengths	Areas for Improvement
High food storage compliance (90%) sustained across four consecutive quarters	Persistently low data quality scores in Lodwar (78%) and Mombasa (74%)
Strong and improving cooking & serving standards, led by Kisumu (94%/92%)	27% of identified issues remain open or in progress beyond target resolution time
Positive quality trend across all three tracked indicators since Q1	Supplier warehouse compliance gaps affecting 24% of audited suppliers

3. Assessment Scope and Methodology

The QA assessment combined on-site inspection, document review, stakeholder interviews and quantitative data analysis across six programme regions. A total of 60 school visits were conducted, distributed as follows.

Assessment Methodology

Component	Description
On-site Inspections	Direct observation of feeding operations, including kitchen hygiene, meal preparation and serving practices.
Document Review	Review of procurement, storage, and distribution records against programme standards.
Stakeholder Interviews	Structured interviews with school staff, volunteers and community representatives.
Data Analysis	Statistical review of quality metrics and historical performance data across four quarters.
Scope Limitations	Wajir, Garissa and Moyale were excluded from this assessment cycle due to prevailing security conditions; a remote document-based review is planned for these locations in Q3.

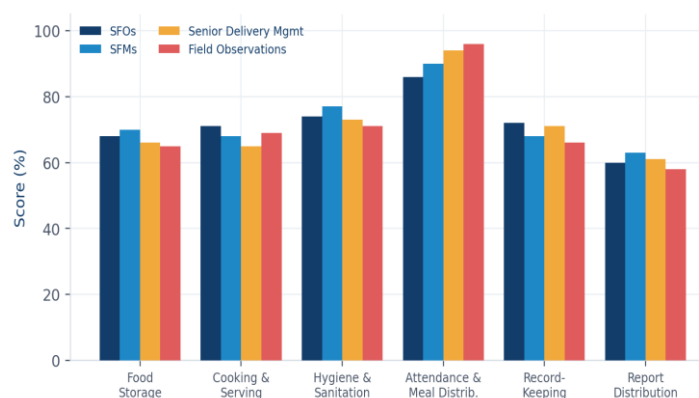

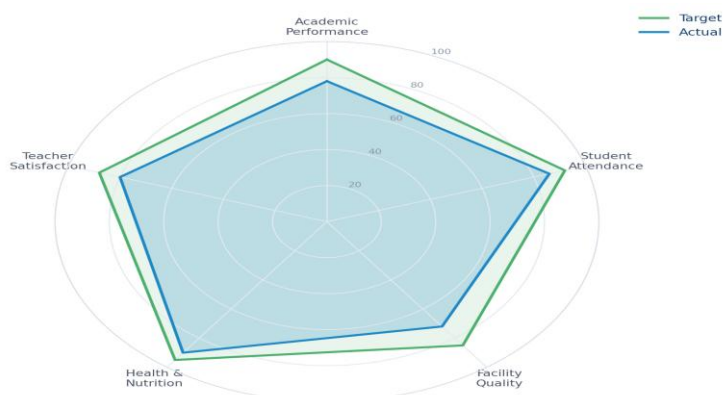

4. School Assessment Findings

Data Quality Scores by Location

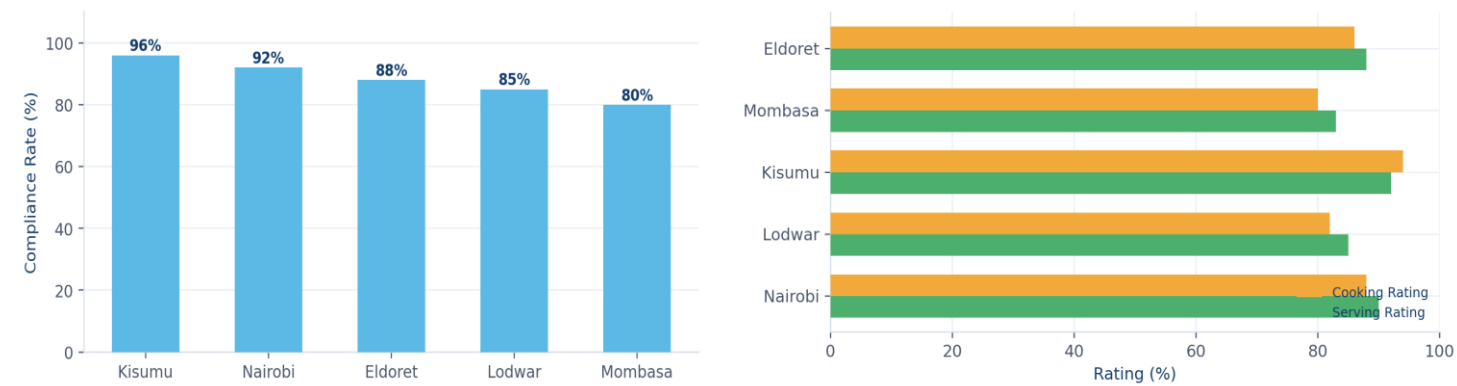

Location	Data Quality Score	Programme Affiliate / Partner
Nairobi	85%	Nairobi Affiliate Network
Lodwar	78%	Turkana Partner Alliance
Kisumu	92%	Lake Basin Affiliate
Mombasa	74%	Coastal Partner Trust
Eldoret	88%	Rift Valley Affiliate

Multi-dimensional Performance & Monitoring Checklist

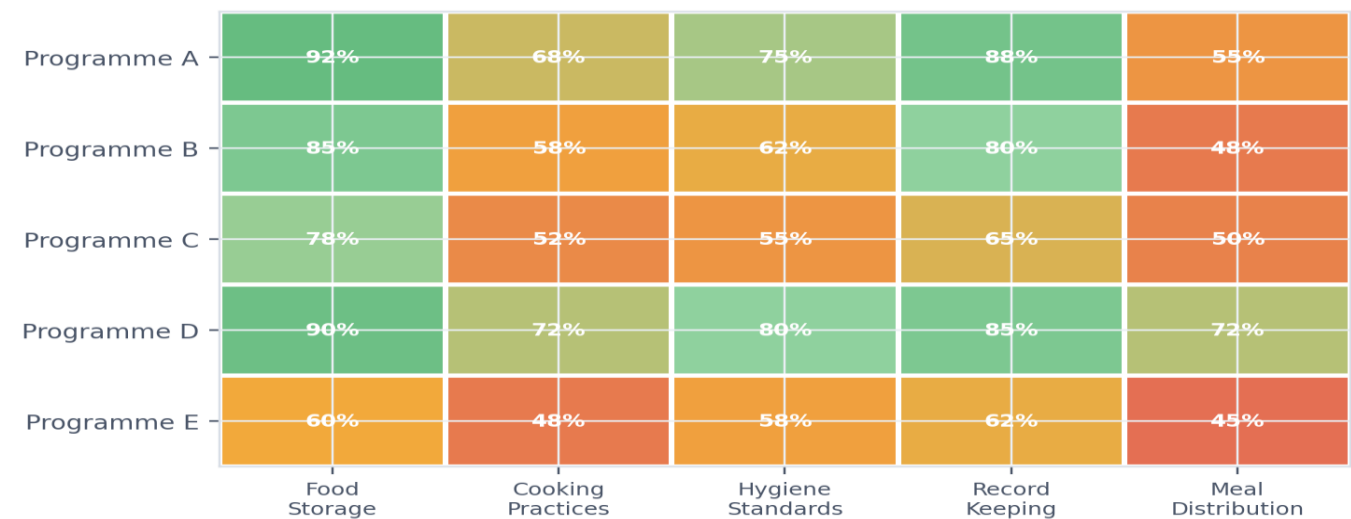

Actual performance vs. target thresholds (left) and comparison of findings recorded by FOs, FM, Senior Delivery Management, and independent field observations (right).

Food Storage Compliance & Cooking / Serving Ratings

Compliance Levels Across Programmes

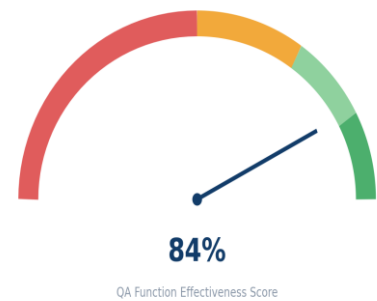

5. QA Function Effectiveness and Supplier Checks

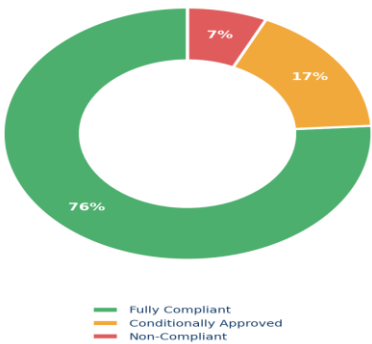

QA Function Effectiveness & Supplier Compliance

An aggregate score reflecting timeliness, coverage and consistency of the QA function itself, alongside supplier warehouse and data quality compliance checks.

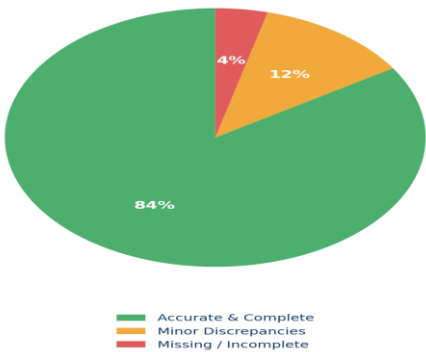

QA Function Effectiveness

Supplier Warehouse Compliance

Data Quality Assessment

Food Production Premises Inspection Results

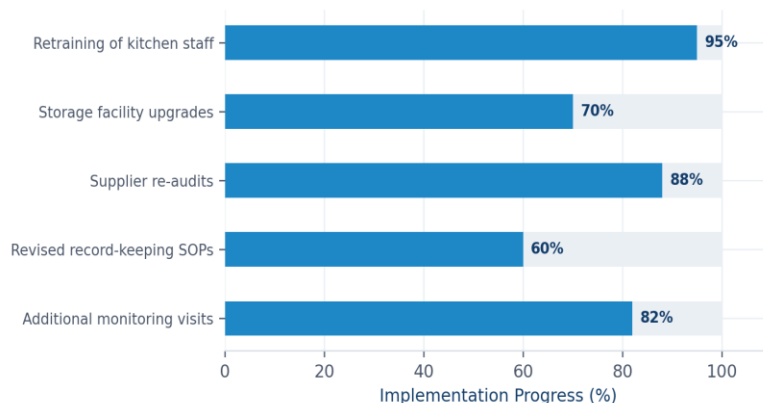

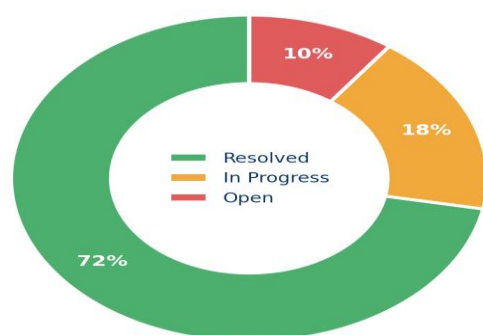

Results from inspections of central kitchens, regional stores and community kitchens supplying the programme.

6. Issue Resolution and Training

Issue Resolution & Corrective Measures

Of the 42 issues identified during this assessment cycle, 31 (74%) have been resolved, 8 (18%) remain in progress, and 4 (10%) are still open. Progress on associated corrective measures is shown alongside.

Training and Guidance Activities Summary

Activity	Participants	Location	Status
Food hygiene & safe handling refresher	48 kitchen staff	Nairobi, Kisumu	Completed
Storage and stock management workshop	22 store supervisors	Lodwar, Mombasa	Completed
Record-keeping and reporting SOP training	35 FOs / FM	All regions	In Progress
Supplier quality standards briefing	14 suppliers	Eldoret	Completed
Community volunteer orientation	60 volunteers	Kakamega, Kisumu	Scheduled — Q3

7. Recommendations and Follow-Up

Post-Assessment Recommendations

#	Recommendation	Priority	Responsible Party
1	Strengthen data-quality controls at Lodwar and Mombasa through targeted refresher training and monthly spot-checks.		Regional QA Coordinators
2	Establish a 14-day resolution SLA for open and in-progress issues, with weekly tracking at programme level.		Quality Assurance & Compliance Unit
3	Conduct re-audits of non-compliant supplier warehouses and suspend orders from suppliers below 70% compliance.		Procurement & Supply Chain Team
4	Roll out standardised digital checklists to reduce discrepancies between FO, FM and field observation findings.		Monitoring & Evaluation Team
5	Schedule a remote document-based review for Wajir, Garissa and Moyale pending improved security access.		Programme Office Director's Office

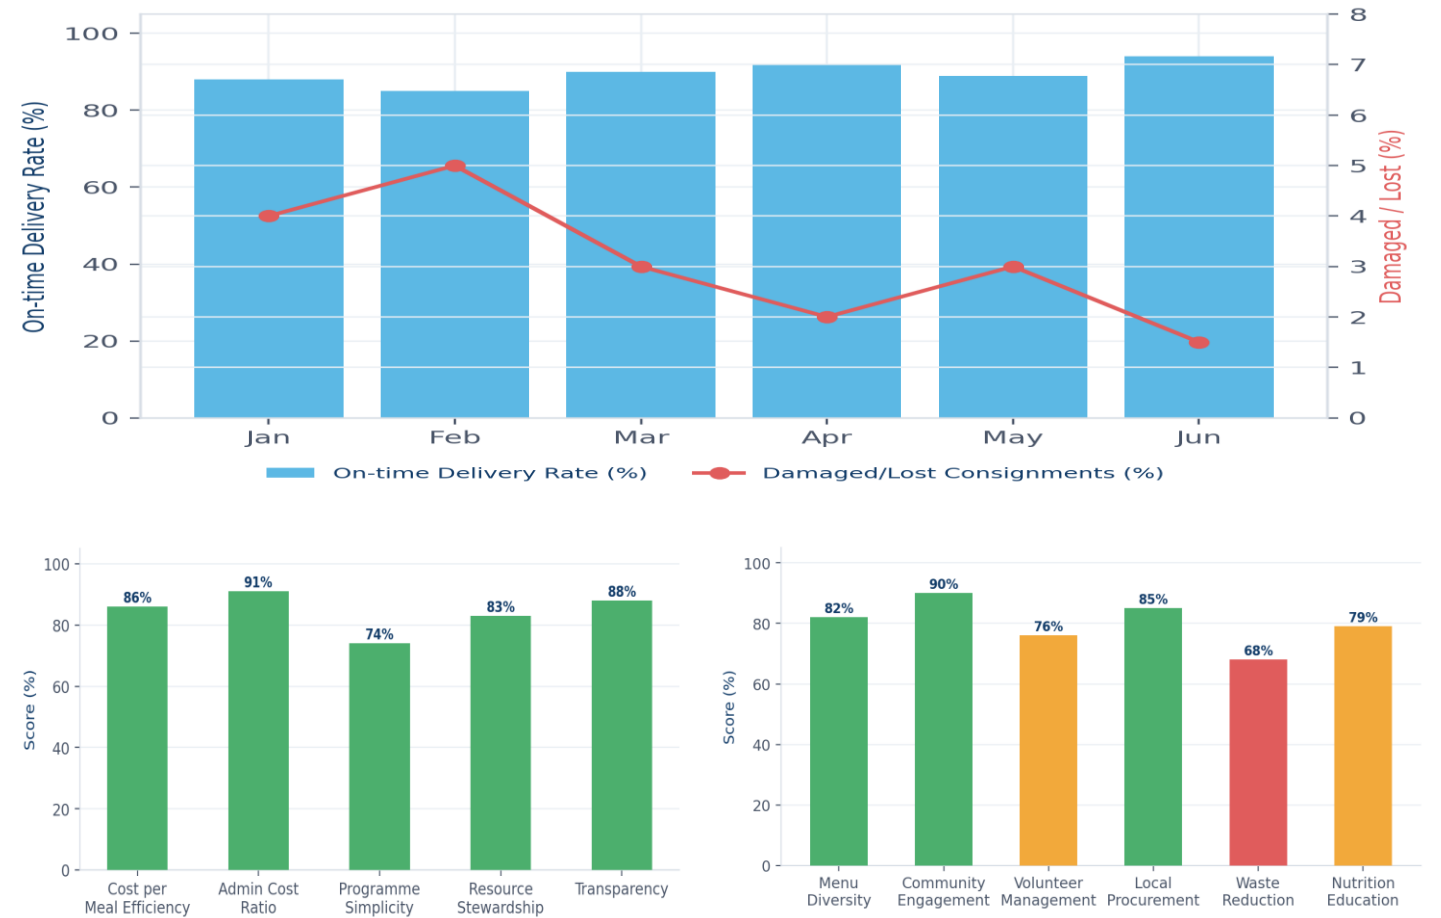

Follow-Up Actions Timeline

Action	Target Completion	Owner
Data-quality refresher training — Lodwar & Mombasa	31 July 2026	Regional QA Coordinators
Issue-resolution SLA policy circulated and adopted	15 July 2026	Quality Assurance & Compliance Unit
Supplier warehouse re-audits completed	31 August 2026	Procurement & Supply Chain Team
Digital checklist pilot launched in two regions	30 September 2026	Monitoring & Evaluation Team
Q3 review of Wajir, Garissa, Moyale scheduled	15 September 2026	Programme Director's Office

8. Periodic QA Status Dashboard

Delivery, Logistics, Stewardship & Best Practices

On-time delivery performance and consignment loss rates over the last six months, alongside stewardship/simplicity indicators and best-practice implementation scores.

9. Conclusion

The EduMeals Alliance programme continues to demonstrate a strong commitment to quality and efficiency in its school feeding operations. This assessment cycle confirms consistent gains in data quality, compliance and service delivery since Q1, underpinned by sustained strengths in food storage and cooking and serving standards.

The recommendations set out in this report — spanning targeted training, faster issue resolution, supplier re-audits and standardized monitoring tools — provide a clear, prioritized path to closing the remaining gaps at Lodwar and Mombasa and across supplier compliance. Progress against the follow-up timeline will be reviewed at the next quarterly QA cycle.

By addressing these areas, EduMeals Alliance can further strengthen its impact and uphold its mission of providing nutritious meals to children in need.
